

1500

vertical vent valve

ABS APPROVED. Wager's vertical vent check valve is compact and rugged in design. It is cast in hot dip galvanized steel for protection from the harsh environment. A high density polyethylene disc style float seats to a neoprene gasket for a positive seal in the closed position. A 30 x 30 mesh stainless steel flame screen provides protection from deck fires. Dual outlets and manual closures are optional. Stainless steel body material is also available upon request.
