

DECK DRAINS

heavy-wall & heavy wall angled series

134 Heavy Wall Deck Drain

Wager's heavy-wall deck drains are available in both straight and angled configurations. The bodies are cast in galvanized steel, and a cast bronze strainer with trap and baffle is secured with stainless steel flat head screws. The trap and baffle allow for drainage while preventing sewer gases from escaping into the atmosphere.

134 Heavy Wall Angled Deck Drain

Our heavy wall straight drain may also be cast in 90/10 copper-nickel upon request.
