

BOWMONK

Idle Limiter

After many years involvement in the automotive industry, Bowmonk understands the high costs associated with running a fleet and the extent to which long idle times and the resultant fuel consumption and engine wear contribute to this.

We also know that vehicle emissions are a major cause of atmospheric pollution. For this reason we have designed the Idle Limiter. The Idle Limiter assists in saving fuel, minimising engine wear and reducing emissions by shutting an engine down after a preset number of minutes of idling

The Bowmonk Idle Limiter Benefits and Specifications:

- ◆ Easy to Install
- ◆ Easy to Program
- ◆ Saves Fuel
- ◆ Reduces Pollution
- ◆ Installed in both Electrical and Mechanical Vehicles
- ◆ Abuse Count
- ◆ Variable Idle Time Program of 1-9 minutes
- ◆ Tamper Resistant
- ◆ Cost Effective
