

HORIZONTAL

INLINE VENT CHECK VALVE

The In-Line Vent Check Valves protect tanks and bulkheads in the same way as standard vent check valves, and should be used during those operations where vent line require in-the-line valves rather than terminal vents. However, the horizontal design allows for more flexibility during the design phase of your piping project.

SPECIFICATIONS

GALVANIZED STEEL

CONNECTIONS:

- FLANGE WELDING NECK

FLOAT:

- STAINLESS STEEL FULL ROUND

GASKET:

- BUNA GASKET

SIZES:

- 6", 8", 10", 12", (14" ABS TYPE APPROVED)

304 STAINLESS STEEL

CONNECTIONS:

- FLANGE WELDING NECK

FLOAT:

- STAINLESS STEEL FULL ROUND

GASKET:

- BUNA GASKET

SIZES:

- 6", 8", 10", 12", (14" ABS TYPE APPROVED)

316 STAINLESS STEEL

CONNECTIONS:

- FLANGE WELDING NECK

FLOAT:

- STAINLESS STEEL FULL ROUND

GASKET:

- BUNA GASKET

SIZES:

- 6", 8", 10", 12", (14" ABS TYPE APPROVED)
