

ROSEBOX STRAINER

The Rosebox strainer was designed by Keppel -Amfels, and manufactured by Wager. Strainers are designed to allow flow thru the piping system of a ship, but to filter undesirable solids. Most strainers use a 1 to 1 ratio with the pipe dimension, but filtering devices can be selected based upon the job required to be done.

If the liquids passing are highly contaminated or viscous in nature, then a larger strainer may be selected. The strainer is made of perforated sheet metal, is hot dip galvanized for added protection, and contains no moving parts.

SPECIFICATIONS

GALVANIZED STEEL

CONNECTIONS:

- COLLAR CLAMP

SIZES:

- 1.5", 2", 2.5", 3", 4", 6", 8", 10", 12"

STAINLESS STEEL

CONNECTIONS:

- COLLAR CLAMP

SIZES:

- 1.5", 2", 2.5", 3", 4", 6", 8", 10", 12"
